Since 1952, Gene Rich Specialties has provided quality plumbing specialties to wholesalers and re-sellers nationwide. Our commitment to service and customer satisfaction is our #1 priority.

Our most current catalog is always available on our website, along with corresponding pricing spreadsheets.

Please note that many product groups appear with multiple price columns indicating the availability of discounted pricing for larger volume. Unlike sources that offer discounts on single line items, our discounted quantity-break pricing is granted when the combined quantity of any items from the same product group is achieved.

For example, Steel Escutcheons are eligible for 5% off when you buy 500 pcs or more, but there is no need to buy 500 pcs of EACH size. Any combination of sizes from that group totaling 500+ pcs qualifies all items from that group for their respective discounted column price. This is only one example of how we strive to make your buying easier, cost effective and more efficient and sets us apart from many sources in the industry.

For identification purposes only, manufacturer's names may appear in the description of some Gene Rich Specialties replacement parts. (An asterisk * will appear next to a manufacturer's name.) These parts are made to our standards and specifications and should not be confused with the original OEM part.

We encourage you to visit us online where the most current catalog and pricing are always available 24/7, or contact us via phone, fax or email to request additional copies.

We know you have a choice when it comes to plumbing specialties and we sincerely "Thank You!" for considering Gene Rich Specialties, the home of "Eager Beaver Service" for over 70 years!

We welcome your comments and suggestions to help us improve our service and value to you and we look forward to contributing to your ongoing success.

WYPALL TERI TOWELS

Pound for pound, WYPALL X60 Wipers absorb more than 2 times as much water as rags. They bring the absorbing power of HydroKnit technology (for superior absorbency) to a lighter-weight wiper.

Designed to outperform laundered rags, WYPALL X60 Wipers help raise the standard for general-purpose wipers at a terrific value. They don’t use adhesives or binders, so they’ll leave no residue behind and they’re reinforced for strength when wet or dry. These cleaning towels are so sturdy that they can often be used more than once.

When effectiveness and value top your list of criteria, you can trust WYPALL X60 Reusable Wipes to deliver.

PIPE AND SCREW EXTRACTORS

- The square shape of these extractors gives the tool the ability to remove broken bolts, screws & pipes with minimum deformation of the broken part.
- The forged construction imparts an extra degree of toughness, which reduces extractor breakage.
- These forged extractors will not chew up or expand the object being removed.

To remove the broken threaded part:

- Drill a hole in the end of the broken part (left hand spiral, heavy duty drill recommended)
- Insert extractor & turn counter clockwise using a wrench on the exposed end of the extractor.
- The broken part should unscrew without damage to the threads.
